

Combination firefighting by fire extinguisher and spraying water

Fire Brigade Skill Improvement Training (FBI Training)

To fight a fire, "Safety" is the first priority but it is also important to have "Knowledge of firefighting", "Fire extinguisher capability", "Combination firefighting by fire extinguisher and spraying water", "Defensive and offensive firefighting" and "Fire hose handling command". MDPC adapts National Fire Protection Association (NFPA) instruction such as NFPA 600 "Standard on Industrial Fire Brigades" and NFPA 1081 "Standard for Industrial Fire Brigade Member Professional Qualifications". MDPC provides opportunities to variety of training courses to learn worldwide standard firefighting through classroom training and a field training using actual fire.
