

## MDPC-ICS

---

MDPC has adopted Incident Command System (ICS), which is an established worldwide standard for the incident management. It customizes the system to “MDPC-ICS” using MDPC past experiences and knowledge. To share the worldwide standard with private companies, MDPC provides trainings/exercises based on MDPC-ICS and provides supports to make oil spill contingency plans to the petrochemical complexes.

## ICS training service

---

It is difficult to handle the incident beyond your area of responsibility. MDPC provides ICS training to the customers. Through the ICS training and an incident simulation, MDPC shares skills and knowledge for the incident management and the issue management though “lessons learned”. The training and simulation are customized for each customers.
